

Ardenwood Dr - Winbourne Ave Area Rehabilitation Project

City-Parish #13-AR-MS-0034

Project Start: **4th Quarter 2013**
 Advertisement for Bid: **1st Quarter 2015**
 Anticipated Project End: **2nd Quarter 2016**

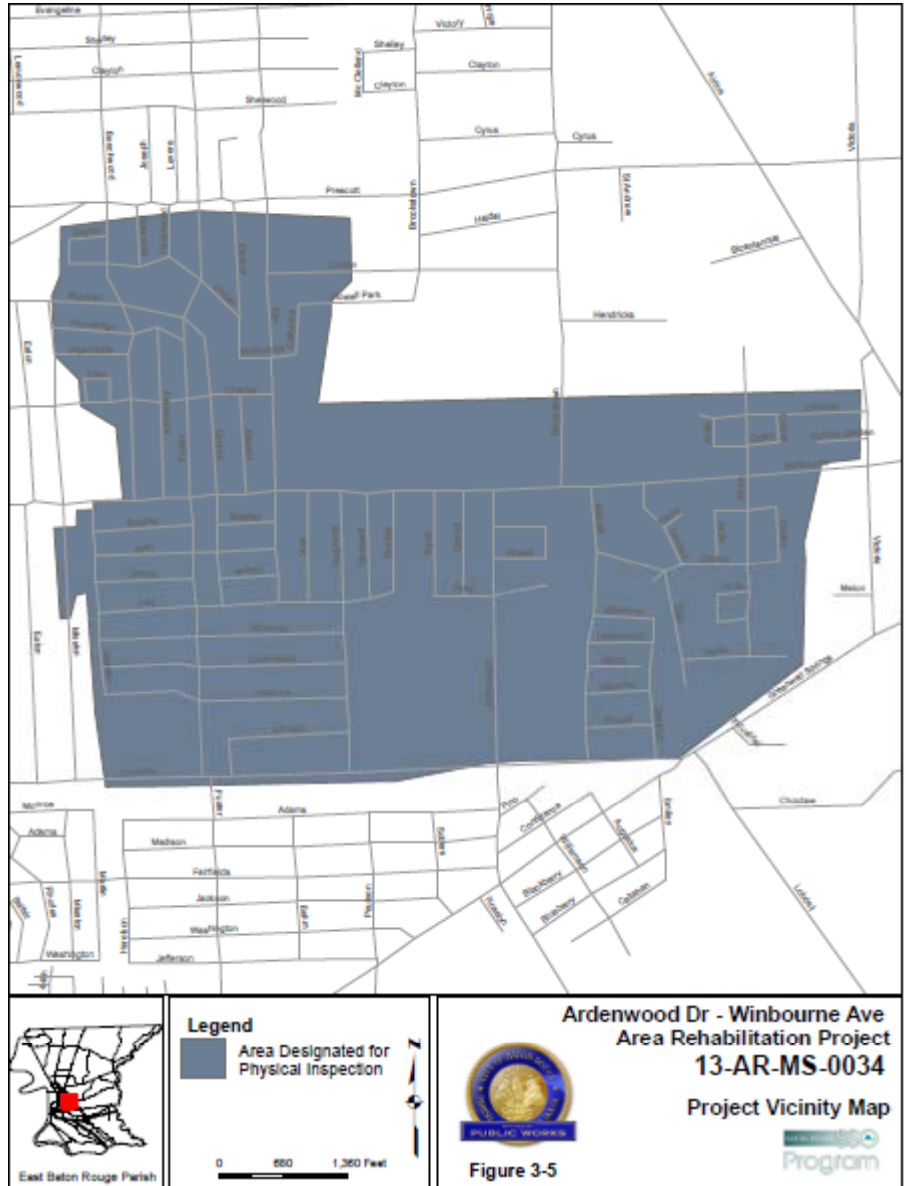

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.

Ardenwood Dr - Winbourne Ave Area Rehabilitation Project Facts

The construction of rehabilitation projects will typically include the following components. For this project:

- Approximately 109,535 linear feet of pipeline will be inspected and rehabilitated
- Approximately 439 manholes will be rehabilitated or replaced
