

Staring Ln Roadway Improvements - Phase 2 (Highland Road to Perkins Road)

City-Parish #06-CS-HC-0024

Advertisement for Bids: **3rd Quarter 2010**
Project End: **4th Quarter 2013**

This project includes the construction of a portion of the new force main from PS58 to the South WWTP. The purpose of this project is to relieve SSOs at PS58 as well as in the respective upstream and downstream basins. The construction of the direct force main from PS58 to the South WWTP alleviates the wet weather flows into existing downstream gravity pipe, and allows the capacity needed for future flows in the Staring Lane area. This project is being constructed simultaneous with the Green Light Plan's (GLP) roadwork.

Design of the Staring Lane FM Phase II project started in April 2008.

60-inch diameter force main will be constructed in the project area.

64-inch diameter force main will be constructed in the project area.

Staring Ln Roadway Improvements - Phase 2 (Highland Road to Perkins Road) Project Facts

FORCE MAIN IMPROVEMENTS:

- 9,430 linear feet, 24-64 in. diameter
